1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16, and 25-30 are drawn to a method and wireless device having a substantially radiation transmissive button and a fingerprint sensor to capture user's fingerprint when user's finger is positioned over the button, classified in class 382, subclass 124.
  - II. Claims 17-24, are drawn to an article for determining the identity of a person operating a remote device using fingerprint information received via a wireless protocol from the remote device, classified in class 340, subclass 5.53.
2. Inventions I, and II, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such a device having a substantially radiation transmissive button, to capture and input fingerprint images to an application for example a fingerprint database or a fingerprint registry, invention II has separate utility such as determining the identity of a person operating a remote device. See MPEP ' 806.05(d).
3. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, because of their recognized diverged subject matter, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2623

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
